

July 1st, 2021

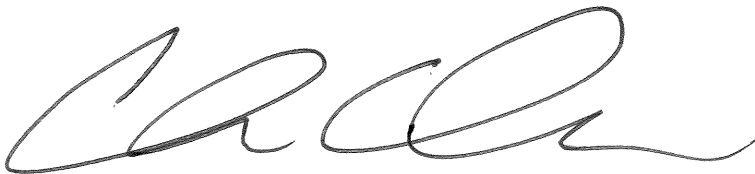

To whom this may concern,

Protech Mechanical is and has been SSC's vendor of choice for all major HVAC repairs at Texas A&M Corpus Christi. They have extensive knowledge of this campus and all the mechanical systems both DX style units and everything tied to our Central utility plant and hot/chilled water loop. SSC has a standing service contract with Protech Mechanical to be used at SSC's discretion for service hours to assist with HVAC work order issues. Ameresco has used them as their mechanical sub for their phased projects working under contract with the University which included chiller replacement, CWP installs, VFD commissioning and are the contracted firm to address warranty issues within those projects outside of the newly installed Daikin and Trane chillers in the Central Utility Plant.

SSC highly recommends them as the ODR to the University for service and installation of any and all HVAC mechanical projects on this campus.

Sincerely,

Chris Osuch
Director of Facilities, SSC
Texas A&M University- Corpus Christi, TX
